

Wireless & Web Access for FasseTrack

FasseTrack Freedom lets you access your FasseTrack data in real-time wherever and whenever there's a compatible wireless or Web connection!

FasseTrack Freedom can be used to remotely manage and track data for many different FasseTrack applications, including:

- ❑ Asset Management
- ❑ Inventory Control
- ❑ Delivery Tracking (Route Accounting)
- ❑ Time and Attendance
- ❑ Item Check-In/Check-Out
- ❑ Shipping and Receiving

FasseTrack Freedom offers you the same ease-of-use and direct control over your organization's data holdings as FasseTrack, with the added benefit of remote, wireless and/or Web-based access. Item details can be directly verified and updated in real-time, so your information is always up-to-date. Say good-bye to batch style data transfers! FasseTrack Freedom is also economical, reliable, and secure.

FasseTrack Freedom Configurations and Options

FasseTrack Freedom is available in any of the following configurations as an add-on for FasseTrack systems, beginning in December 2001:

- ❑ Wireless Wide Area Network (WWAN) connectivity using Cellular Digital Packet Data (CDPD) technology with data transfer rates of up to 19.2 Kbps on Palm OS and Microsoft Windows for Pocket PC based platforms
- ❑ Wireless Local Area Network (WLAN) connectivity with data transfer rates of 2 Mbps (802.11 compatible) or 11 Mbps (802.11b compatible) on Palm OS, Microsoft Windows, and Microsoft Windows for Pocket PC based platforms
- ❑ Web browser interface for Desktop or Wireless PCs

FasseTrack Freedom Customization

In addition to the many features and flexibility built into FasseTrack Freedom, there may be other requirements that your organization especially needs. No problem. Compusult can produce custom versions of FasseTrack Freedom to accommodate any desired functionality. We also provide training, data conversion, and technical support services.

Call us toll free at **1-888-388-8180** or send e-mail to info@fassetrack.com for more details or a free quotation.

Compusult Limited wishes to gratefully acknowledge that the launch of FasseTrack Freedom was helped made possible through funding under the Government of Newfoundland and Labrador Sending Your Signal Program, administered in coordination with the Department of Industry, Trade and Rural Development and Receiving the World 2001 Celebrations.

The Province of Newfoundland and Labrador is proudly "Receiving the World" in 2001 with celebrations honouring the 100th anniversary of Guglielmo Marconi's outstanding advancement in communications technology. Marconi created for himself and the province a place in history when he received the first wireless transatlantic message atop Signal Hill in 1901. As part of its contribution to Receiving the World celebrations, the Department of Industry, Trade and Rural Development is showcasing the significant contributions made by Newfoundland and Labrador companies currently operating in the field of communications and advanced technology through a series of industry-oriented events and programs.

Further information on industry related Receiving the World initiatives can be found on the World Wide Web at: <http://www.wirelessnf.ca>

Compusult Limited is an authorized reseller of bar code scanners, portable data collection terminals, bar code labels, label printers and label printing software, etc. and can provide a complete, turn-key solution for all your data management needs. Compusult also provides systems that are fully accessible to persons with disabilities.
